Re:

Chesapeake-Portsmouth Broadcasting Corporation

WLES (AM), Bon Air, Virginia

Facility Identification Number: 72504

Special Temporary Authority

## Dear Counsel:

This is in reference to the request filed May 16, 2011, on behalf of Chesapeake-Portsmouth Broadcasting Corporation ("CPBC"). CPBC requests further extension of the special temporary authority ("STA") granted on August 5, 2009, to operate Station WLES pursuant to Section 73.1615.

In support of the request, CPBC states that commonly-owned Stations WLES and WLVA hold construction permits authorizing an exchange of frequencies (*See* Note 1, below). CPBC states that WLES has been operating on its new frequency pursuant to STA while WLVA has been silent. CPBC further states that it has not been able to license its STA operation due to a requirement that WLVA must complete its modification, which has not been possible until recently.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or

<sup>&</sup>lt;sup>1</sup> WLES is licensed for operation on 580 kHz with 0.201 kilowatt daytime and 0.027 kilowatt nighttime, employing a nondirectional antenna (ND-2-U). Construction Permit BP-20071119AKH authorizes a change in frequency to 590 kHz and operation with 0.6 kW daytime and 0.058 kW nighttime. The permit is conditioned on Station WLVA changing frequency from 590 kHz to 580 kHz and implementing changes authorized by Construction Permit BP-20071119AKG.

• No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that both WLES and WLVA have filed license applications<sup>2</sup>, which remain pending. Thus, the licensee has made substantial progress toward restoring licensed operation, and extension of STA is warranted to allow time for processing of the license applications.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WLES may continue to operate on 590 kHz with the facilities authorized by Construction Permit BP-20071119AKH. It will be necessary to reduce power or cease operation if complaints of interference are received. CPBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on January 27, 2012.

Sincerely,

Charles N. Miller, Engineer

Audio Division Media Bureau
